(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
25028	Drainage of forearm lesion	T	0049	21.7810		2,287.01	1,720.70

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
26145	Tendon excision, palm/finger	T	0053	16.6121		1,744.27	1,312.36

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
27330	Biopsy, knee joint lining	T	0050	29.8816		3,137.57	2,360.65

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
28340	Resect enlarged toe tissue	T	0055	21.6207		2,270.17	1,708.04		
28341	Resect enlarged toe	T	0055	21.6207		2,270.17	1,708.04		
28344	Repair extra toe(s)	T	0055	21.6207		2,270.17	1,708.04		
28345	Repair webbed toe(s)	T	0055	21.6207		2,270.17	1,708.04

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
32201	Drain, percut, lung lesion	T	0070	5.3343		560.10	421.41

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
50686	Measure ureter pressure	T	0126	1.0435		109.57	82.44

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
82726	Long chain fatty acids	A				75%ofUC	75%ofUC		
82728	Assay of ferritin	A				75%ofUC	75%ofUC		
82731	Assay of fetal fibronectin	A				75%ofUC	75%ofUC		
82735	Assay of fluoride	A				75%ofUC	75%ofUC		
82742	Assay of flurazepam	A				75%ofUC	75%ofUC		
82746	Blood folic acid serum	A				75%ofUC	75%ofUC		
82747	Assay of folic acid, rbc	A				75%ofUC	75%ofUC

The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount		
86920	Compatibility test, spin	X	0345	0.2194		23.04	17.33

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").** When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment. **A Status Indicator (SI) column** is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

(c) The Montana Hospital and ASC Outpatient Fee Schedule Organized by CPT/HCPCS, Effective October 1, 2009

Montana has adopted the Ambulatory Payment Classifications (APCs) which are listed in the preceding section (b) for outpatient (Hospital and Ambulatory Surgery Center) reimbursement for workers' compensation services. The middle column in this document lists the respective APC code, when there is one, for the CPT or HCPCS codes listed in the first column of this spreadsheet. The right hand columns list the reimbursements for each APC for both Hospitals and ASCs (Ambulatory Surgery Centers). **The APC conversions below are effective beginning October 1, 2009. See the archives section "(i) Archives" of this fee schedule to determine Montana's APC rates prior to October 1, 2009. Unless the rightmost columns indicate a reimbursement value, or their Status Indicator codes specify how reimbursement is to be made, individual CPT and HCPCS codes should be reimbursed at 75 percent of usual and customary charges ("75%ofUC").**

When two or more T status code items are on the same APC claim, the highest weighted code is paid at 100 percent of the Montana APC payment, and subsequent T status code items are paid at 50 percent of the Montana APC payment.

A Status Indicator (SI) column is included with this fee schedule, to assist in the interpretation of the APC codes. For those unfamiliar with SI codes, a SI table that includes definitions is located at the "(g) The Montana Status Indicator (SI) Codes" section. Only Montana Status Indicator codes can be used to calculate reimbursements for services and supplies. Do not use status indicator codes other than A, B, D, F, G, H, K, L, N, P, S, T, and X, and pay at the fee scheduled amount listed.

HCPCS Code	Short Descriptor	SI	APC	Relative Weight	* Indicates Change	Hospital APC Reimbursement Amount	Ambulatory Surgery Center (ASC) APC Reimbursement Amount
