1	Much of the initial work can be done by subcommittees as has been done over the years.	4/6/2016 3:56 PM
2	The two biggest cost drivers are injury frequency and duration off work. These should be a focus. Funding of WorkSafeMT should be considered. Montana OSHA could result in benefits and was a close vote. Might want to compare what was in the LMAC bill vs. SB 334 and consider those items left off. Comparisons to peer States. The Governor requested we find a solution to subrogation.	4/4/2016 12:12 PM
3	we should revisit the rules by which LMAC supports or opposes wc issues and pending legislation. The current rules limited the Committee's effectiveness during the last session of the legislature.	4/1/2016 9:34 AM
4	The topics presented in item #3 above fully encompass the issues we have been working on to date. The necessity to address these issues and the work needed to prepare, communicate, and present fair and balanced bills to the legislature prevented me from presenting other topics in item #4. We absolutely need to address the safety culture in Montana. Our national ranking in safety makes this an obvious focus for LMAC. A drug formulary is equally important as narcotic abuse in the workers' compensation system is epidemic and extremely costly to every person impacted by workers' compensation insurance. HB 334 correctly addressed PPD and physician choice. We need to give that bill time to fully realize if tweaks are needed in these areas. Extra territorial issues exist with many other states including North Dakota but that really is an issue for the commissioner of securities and insurance. Subrogation is a supreme court issue and one that LMAC will not be able to impact other than to bring it to the attention of legislators which we have already done and will continue to do. Safety training to youth is important as it helps shape the future generations on the importance of safety. Our work on State Safety and Compliance regulations or State OSHA will include programs that require employers to more aggressively address safety issues in their workplace. Return to Work programs like the state's transitional duty program is very important in helping employers manage the high cost of workers' compensation insurance. Finally, with a legislative session looming, I believe we will need to meet monthly in order to bring value to the table during the session. LMAC is a respected and valued group by the legislators and we've worked hard to build that relationship. They listen to what we bring to them in the workers' compensation arena. Thanks very much for valuing this council through reappointment.	3/31/2016 11:39 AM
5	Thank you for asking the questions,	3/30/2016 12:42 PM
