RE: Adoption of the State's Average Weekly Wage for Fiscal Year 2018

Section 39-71-116, Montana Code Annotated, requires the Department of Labor and Industry to adopt a maximum wage compensation rate to be used during the fiscal period July 1 through June 30. The rate is based upon survey information compiled by the Department of Labor and Industry to determine the state's average weekly wage. The state's average weekly wage has been established at \$768.11. The Department adopts the figure of \$768 to be used as the maximum weekly compensation rate as set forth below.

For injuries occurring on or after July 1, 2017 through June 30, 2018, all insurers must use \$768 as the maximum weekly compensation rate for temporary total disability benefits, permanent total disability benefits, temporary partial disability benefits, rehabilitation benefits and death benefits. For permanent partial disability benefits, the maximum weekly compensation rate is \$384 per week for injuries occurring on or after July 1, 2017 through June 30, 2018.

Beginning July 1, 2017, through June 30, 2018, the minimum weekly compensation rate for injuries causing death shall be \$384 per week, but in no event may it exceed the decedent's actual wages at the time of death.
