RE: Permanent Total Disability Benefit  
Cost of Living Increase

The cost-of-living adjustment is the percentage increase, if any, in the state's average weekly wage as adopted by the Department over the state's average weekly wage adopted for the previous year. Section 39-71-702(5), MCA, allows an adjustment of permanent total disability benefits (PTD) benefits for the cost of living on post July 1, 1987, claims. The state's average weekly wage effective July 1, 2024, is \$1,084. The percentage increase from \$1,034 (last year's average weekly wage) to \$1,084 is **4.84%**.

**For dates of injury occurring on or after July 1, 1987 through March 25, 2003**, the cost of living adjustment is the percentage increase, if any, in the state's average weekly wage as adopted by the Department over the state's average weekly wage adopted for the previous year, or 3%, whichever is less, and claims of this vintage are limited to a maximum of *only* 10 benefit adjustments. Therefore, **a rate of 3%** should be applied to the benefit amount of any worker who has received 104 weeks of permanent total disability benefits before July 1, 2024, on a post July 1, 1987, claim, subject to the 10 adjustment limit.
